08 Summary

Business Problem

20.2%
Qx Conversion
20+ years in market

13.0%
Mx Conversion
4 years in market

55%
Performance Gap
Qx outperforms Mx

The Problem

Mx is 4 years old and still closing at two thirds the rate of Qx. Our analysis suggests the gap is a targeting problem, not a product problem

Our Questions

→Which account types convert for Mx?

→Which titles close deals within those accounts?

→Where do Mx and Qx profiles overlap?

Data Prep

Dataset

- 16,644 QALs across 2 years (2024–2025)
- Modeled separately: Mx (4,081) and Qx (12,169)

Target Variable

- Progressed = SQL, SQO, or Won
- 18% positive class overall

Cleaning

- NAs treated as “Missing” category
- Titles grouped by seniority and function; rare levels collapsed

Modeling Setup

- 80/20 stratified split; class imbalance addressed
- Logistic regression selected

Statistically Significant Findings

Manufacturing Model *Baseline: CDMO* ● CMO: **1.70x**	**Account Tier** *Baseline: Large* ● Small: **1.40x** ● Medium: **1.40x**
Industry *Baseline: Blood & Biologics* ● Non-Life Sciences: **0.43x**	**Site Function** *Baseline: Active Pharma* ● Non-Manufacturing: **0.25x**

Ideal Mx Target Account

	Target	Avoid
Manufacturing Model	CMO, CDMO	
Account Tier	Small, Medium	Large
Site Function	Any actual manufacturing site.	Non-Manufacturing
Industry	Blood & Biologics, Medical Device, Pharma & BioTech	Non-Life Science

Statistically Significant Findings

Contact Title	**Channel**	**Priority Signals**
Baseline: Academic	*Baseline: Direct / Inbound*	*Baseline: No Priority*
• Unknown: **0.34x**	• External Demand Generation: **0.14x** • Email: **0.33x** • Events: **0.34x** • Outbound Prospecting: **0.36x** • Online Ads: **0.70x**	• Contact Us: **2.16x** • Live Demo: **2.15x** • Video Demo: **1.88x** • Other: **4.75x** • Webinar Demo: **0.42x** • P2: **0.23x**

Mx Ideal Contact

	Target	Avoid
Title	VP / Heads	Unknown
Channel	Direct / Inbound, SEO	External Demand Gen, Email, Events, Outbound.
Priority Signals	Contact Us, Live Demo, Video Demo	Webinar Demo, P2

Site Function x Title

Site Function	Title	Conversion Rate
Medical Device Manufacturing	Technical	18.6%, 145 records
	Manager	17.1%, 217 records
Other Manufacturing	Executive	27.7%, 47 records
	Manager	27.5%, 69 records
Active Pharma Manufacturing	Executive	15.7%, 248 records

How Mx is Different

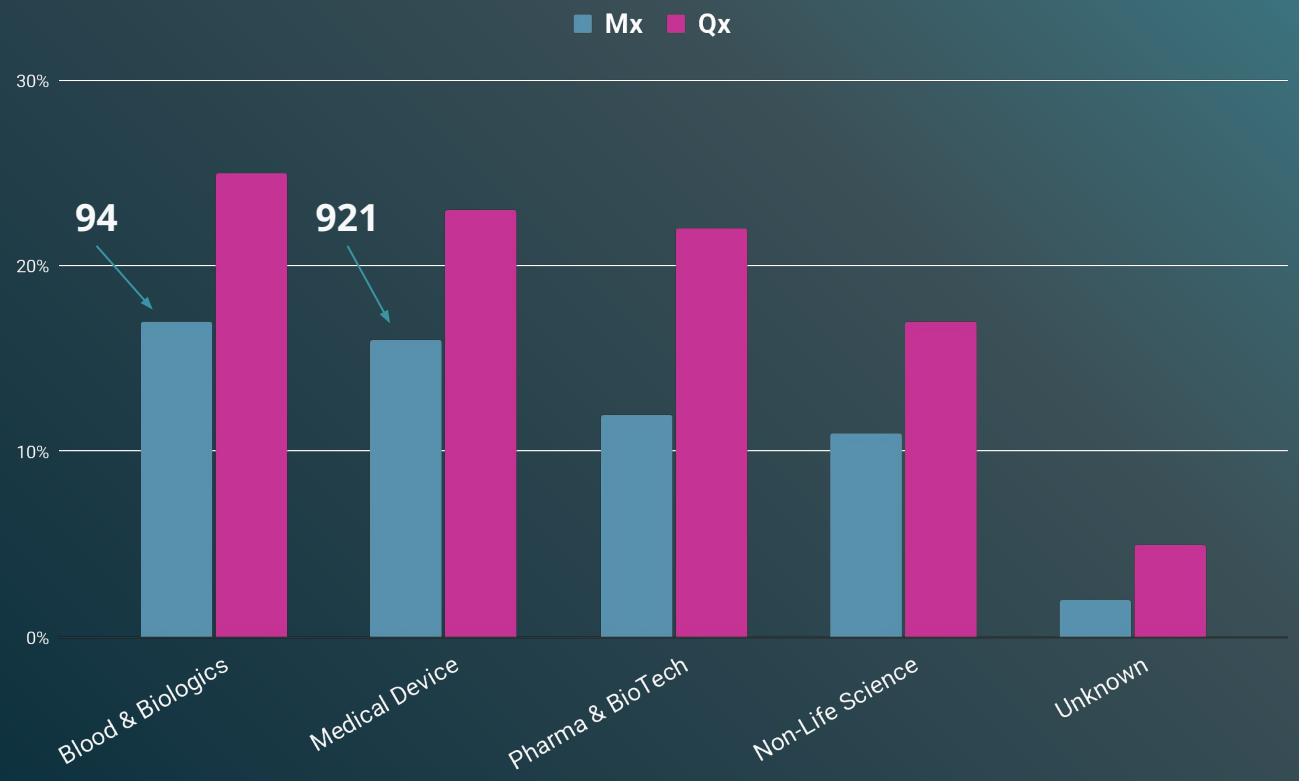
Mx

- Manufacturing sites
  - Avoid non-manufacturing sites
- CMO - best signal
- No title is statistically significant

Qx

- Non-manufacturing sites
  - Neutral performance
- CMO - neutral
- VP/Head

Conversion Rate by Industry



Cross-Selling

	Mx Only	**Cross-Sell**	Qx Only
Site Function	Medical Device	**Medical Device**	Other Manufacturing
Mfg Model	CMO	**No cross-sell opportunity**	None*
Industry	Medical Device	**Medical Device**	Medical Device
Title	None*	**VP/Head**	VP/Head
Account Size	Small/Medium	**Small/Medium**	Small/Medium

Business Impact

Targeting the right accounts converts at 1.3x the current rate.

Shifting focus to CMO/CDMO accounts yields +163 additional conversions per year. The goal is not to cut volume but to replace low quality leads with high quality ones. Reallocating budget from email and events toward inbound and SEO maintains pipeline size while improving conversion rate.

Summary

Target CMO and CDMO manufacturers in pharma and medical device. Mid-market. High-intent signals only.

Account

CMO or CDMO. Small or medium. Pharma or Medical Device. Avoid non-manufacturing.

Contact

VP or Head level. Avoid missing titles and Priority 2 leads.

Channel

Direct/Inbound and SEO. Move budget away from email, events, and demand gen.

Mx vs. Qx

CMO is Mx's best signal. Manufacturing sites are essential for Mx.
